

Digital Transformation Consultancy and Training

Who are we?

We improve education outcomes using technology

We Manage IT Services

We support every aspect of the user journey with ICT.

We Connect Users

We connect users to their applications and data at school or home.

We Secure Networks

We secure the services you use.

We Engage Classrooms

We select high-quality hardware fit for an engaging classroom.

We Provide Consultancy

We provide you with experienced education expertise to support you in the design of your digital transformation strategy.

We Train Staff

We work with you to devise a CPD plan to support the digital literacy of your education staff.

“ Technology will never replace great teachers, but in the hands of great teachers, it’s transformational. ”

George Couros

Google for Education

Microsoft Education

The Computeam Difference

Recent Microsoft research suggests just 15% of the 755 primary and secondary school teachers surveyed felt confident using technology and only 33% had received hands-on training in digital skills. Similarly, a further Microsoft study revealed that 47% of teachers feel they cannot access enough training to support their students. This is why we are now pleased to offer a Digital Transformation training programme to compliment our managed services package.

The training programme has been designed and structured by ex-teachers who have hands on experience of what it is to work in a post-covid, future aspiring education system. We see that school staff have had to accelerate their digital literacy skills in the past 5 years, and as a leadership group it is often difficult to know how to best meet the needs of the staff in a time-poor environment, and further still, measure the impact of the changes afoot.

What we offer:

Relatable: A named dedicated Computeam Training lead.

Personalised: Bespoke consultancy to the needs of your education setting.

Accountable: A keen focus on data analysis and reporting.

SMART: We will help you design personalised transformation metrics.

Flexible: A customisable training package tailed to your setting.

Adaptable: Termly reviews allow us to 'course correct' if emerging needs develop.

Aspirational: A future forward-thinking initiative that is ever evolving.

Consultancy timeline

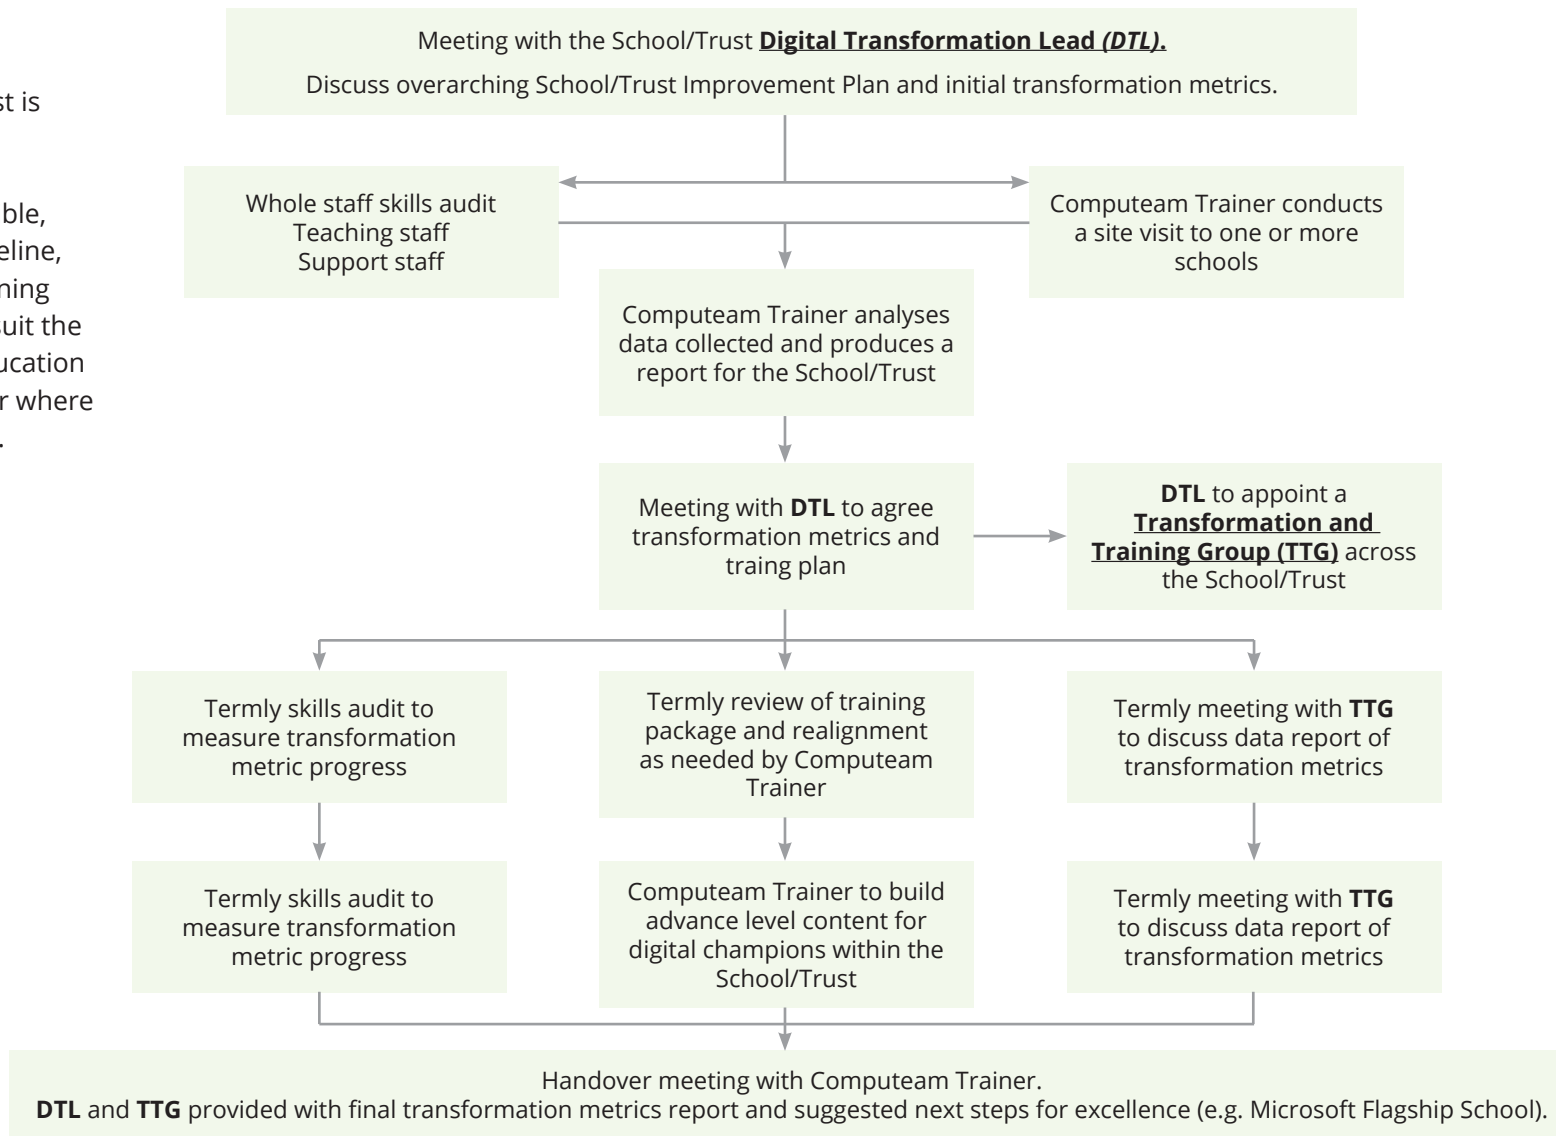

Every School/Trust is different.

But, with our flexible, customisable timeline, we can find a training pathway to best suit the needs of your education setting. No matter where the starting point.

Year One →
Three terms

Year Two →
Two terms

Year Two →
One term

*This example is an average timescale of a digital transformation project. The flexible timeline can be adjusted to suit the budget, emerging needs and transformation goals of your School/Trust.

Skills audit

The skills audit acts as a vital tool to measure impact across the education setting. We understand the time constraints of school staff, and as such we want to ensure that the digital transformation programme we implement has the desired outcomes, to make it worth the time invested.

As pedagogists we understand the concept of evidence-based research and we are inspired by the EEF's work to maximise academic impact through the lowest possible costing.

Initial whole staff skills audit.

Thorough and broad to account for all possible pathways of progress.

Year One – Year Two 5 x streamlined skills audits. (Termly)

Aim to be 5-10 minutes maximum (possibly a staff briefing task).

Year Two Handover skills audit.

Precise and reflective with comparison measures to initial audit.

- ✓ Customised audit.
- ✓ Branched for teaching and non-teaching staff.
- ✓ Data shared via personalized dashboard.
- ✓ One-to-One call for CTL with Computeam Trainer to analyse.

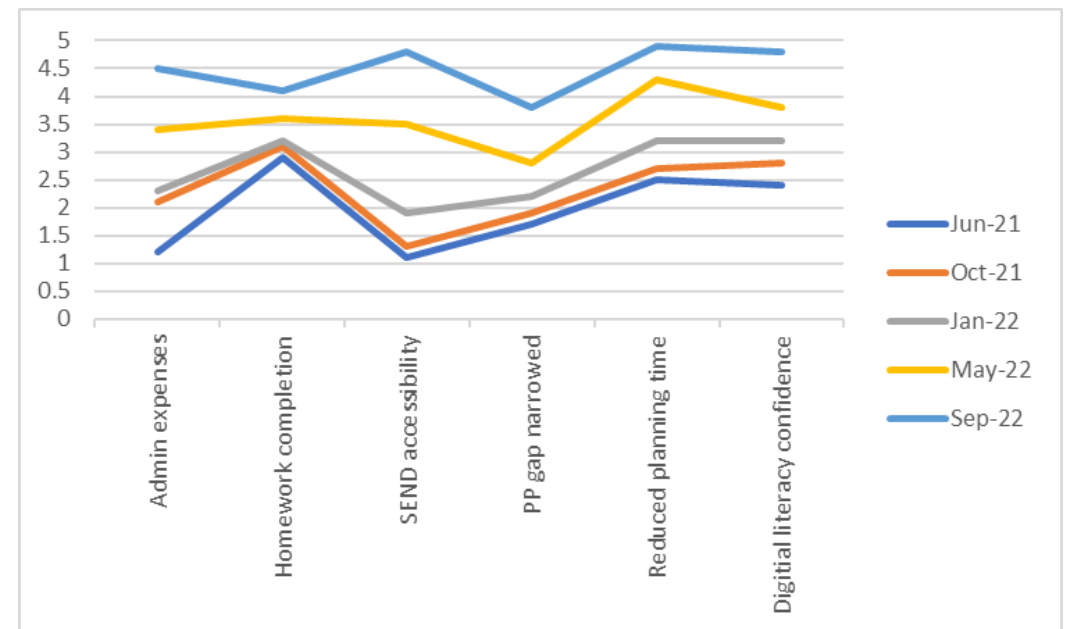

Transformation metrics

We recognise you are investing a lot of time and money into your digital strategy. Therefore, a key factor in our delivery is making sure we support you in **identifying, measuring and evaluating** your chosen transformation metrics.

We respect that each individual School/Trust will have **diverse, bespoke needs for their digital transformation**. And, whilst the below are suggested metrics, the initial meeting and audit are vital in ensuring our approach and agreed metrics are tailored to the overall improvement plan for the School/Trust.

Suggested measurable transformation metrics:

- Financial: Reduced admin expense.
- Academic: Narrowing the GAP (e.g. Pupil Premium, Gender)
- Wellbeing: staff retention rates
- Efficiency: Reduced lesson planning time
- Future proofing: Supporting Gatsby Benchmarks.
- Behaviours: Reduced digital safeguarding concerns.

Example transformation metrics for schools

Transformation dashboard

Using data from the skills audits, checkpoints and transformation metrics we will produce a custom-made dashboard for your School/Trust. This personalised overview uses live data and can be customised to your organisation colours, with an embedded logo.

The decision of what data to include on the dashboard will be discussed at the TTG and is published in a format suitable for all school stakeholders to view.

Training to suit your budget

Following the initial audit phase, our **training package proposal** will be tailored to each School/ Trust based on several factors; size of staff body, prior knowledge, current educational software used (M365, Google, Apple), agreed transformation metrics.

However, we will always aim to provide **tiered options to suit the budget** of your organisation.

Our basic package starts from £1250 and includes:

- Termly consultancy check-ins with your Computeam training Lead – conducted via MS Teams.
- Full access to our custom-built asynchronous learning platform; Learning Locker.

Optional extras:

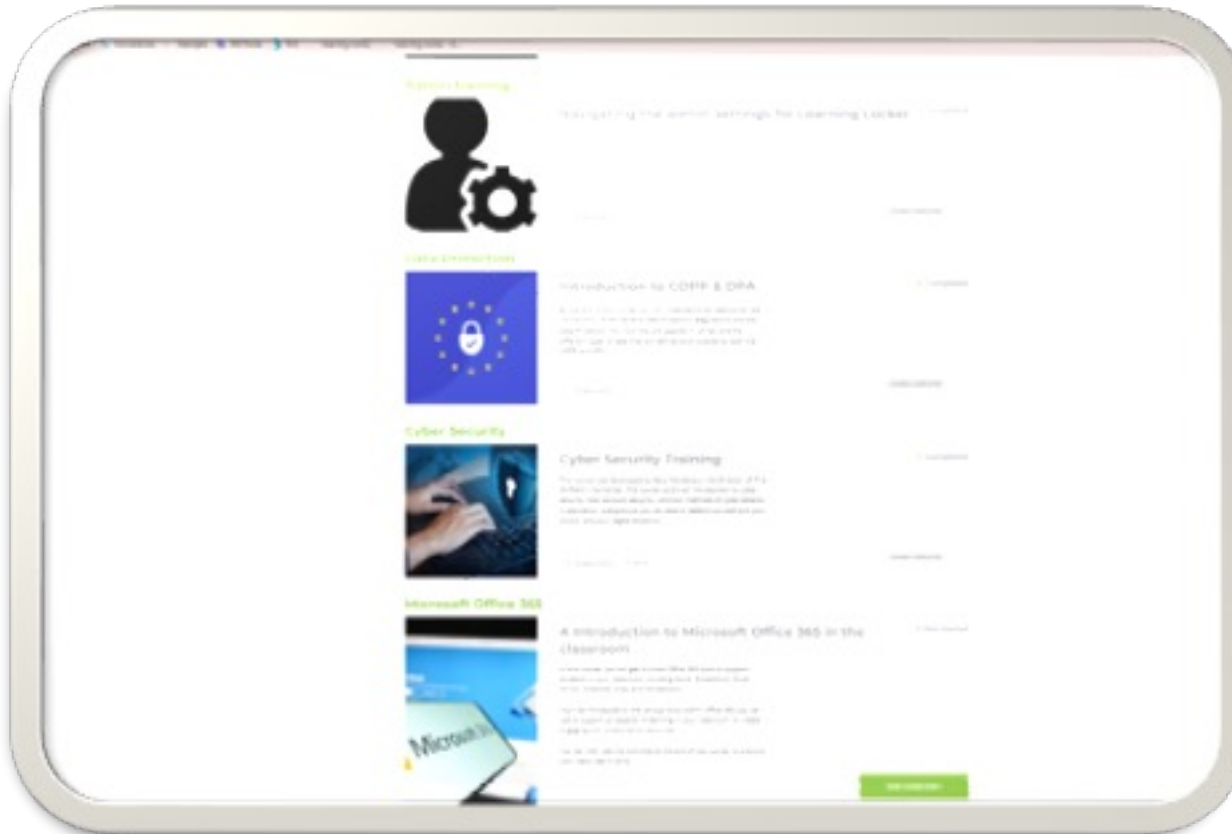

- On-site face to face training sessions with large or small staff groups.
- Live online training via Teams, Google Meet or similar with small groups or multiple academies.
- On-site demonstrations of Google/ Apple/ Microsoft products to enhance teaching and learning.
- Team teach in a classroom with one of our education experts.
- Specialist accessibility sessions (on-site or virtual) for SEND provision.
- Specialised consultancy to start your school on a pathway to becoming a flagship school.

Learning Locker

Computeam are invested in bringing **flexible asynchronous learning** for school staff. Training that can be self-directed on a versatile timeframe. Which is why Learning Locker is at the heart of our training programme.

We developed Learning Locker as an online learning platform, tailored with content specific to staff working in an educational setting.

You will find compliance courses; for example, GDPR and Cyber Security. Together with, upskilling courses for both Microsoft and Google platforms.

Course completion can be monitored and tracked by the allocated school administrator.

Once signed up, your school admin or CPD lead can also use our platform to create and host your own School/Trust specific learning content. For example; induction materials, behaviour policy, school specific software, statutory performance management.

Next steps - contact us

Are you an existing School or Trust working with Computeam?

Please contact your allocated **Account Manager** to enquire about adding Digital Transformation Consultancy and Training to your managed service package.

New to Computeam?

Email training@computeam.co.uk with the name of your School/Trust and one of our team will get back to you.

Alternatively; call 0800 862 0123 (Option 2) or use the Contact us form on our website www.computeam.co.uk
