## ActiveWorksheets

### Develop enquiry based, historical thinking

-  Undertake an archaeological excavation right in your classroom with none of the mess!
-  Designed for KS2.
-  5 sheets combine to make one trench, with augmented reality artefacts hidden among them. Using the iDig app, pupils can excavate the augmented reality artefacts and examine them further in "Lab Mode".
-  Can your class piece together the puzzle - who is the man in the grave?

**Search for iDig ActiveLens' on iTunes and Google Play. Download the free app and try it for yourself!**

Point the app at the section of the trench to the right.

Now excavate the coin that you have discovered!

The coin is ambiguous, showing both Viking and early Christian symbols. The coin has the inscription 'Dominus Deus Rex' What does this mean? iDig leads the children through the process of discovery, building the critical thinking and historical enquiry skills required of all archaeologists and essential to understanding and interpreting history.
